PROFESSIONAL SUMMARY

Final-year Computer Science student and Full Stack Developer with hands-on experience across React.js, Node.js, and Express.js, backed by 4 shipped projects and a frontend engineering internship. Comfortable owning features end-to-end — from UI components to REST APIs — and quick to pick up new tools (recently shipped two AI-integrated apps using the OpenAI and Web Speech APIs). Looking for a Frontend, Backend, or Full Stack role where I can keep building production software.

SKILLS

Languages: JavaScript, Java

Frontend: React.js, HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, REST APIs, Socket.IO

Database: MongoDB

Tools & Platforms: Git, GitHub, VS Code

Core Concepts: Data Structures & Algorithms, OOP, REST API Design

Spoken Languages: Hindi (Native), English (Professional)

WORK EXPERIENCE

Frontend Engineer — WebTech Graphics

Nov 2025 – May 2026

- Built and maintained user-facing features in React.js, translating design mock-ups into responsive, cross-browser components used in production.
- Refactored shared UI components to improve reusability across pages, reducing duplicate styling and speeding up new feature delivery.
- Collaborated with backend and design teammates to integrate REST APIs into the frontend and resolve UI bugs reported in QA.
- [Add a metric if you have one: e.g. page load time improved, number of components shipped, features delivered per sprint]

PROJECTS

AI Voice Email Writer — Sanskriti University

Apr 2026 – Jun 2026

React.js · Node.js · Express.js · OpenAI API · Web Speech API

- Built a full-stack app that converts spoken voice input into polished, professional email drafts using the OpenAI API.
- Implemented real-time speech-to-text capture with the Web Speech API and a Node/Express backend to handle AI generation requests.
- Designed a responsive React UI covering the full flow from voice capture to editable, ready-to-send email output.

Shivvv — AI Virtual Assistant — Sanskriti University

Jan 2026 – Mar 2026

JavaScript · Node.js · Speech Recognition API

- Built a voice-controlled virtual assistant that recognizes spoken commands and executes automated tasks in response.
- Integrated speech recognition and text-to-speech to support natural, hands-free two-way voice interaction.
- Designed the command-handling logic that routes recognized intents to the correct automated response.

Real-Time Chat App — Sanskriti University

Sep 2025 – Dec 2025

React.js · Node.js · Socket.IO · MongoDB

- Built a real-time messaging platform with Socket.IO supporting instant delivery, live presence indicators, and user authentication.
- Designed a MongoDB schema for persistent message storage and retrieval across sessions.

EDUCATION

Bachelor of Technology, Computer Science — Sanskriti University

May 2022 – May 2026

- Relevant coursework: Full Stack Web Development, Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering.
